SKILLS

- ❖ **Frontend & Frameworks:** JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design, Shadcn UI, High-End UI/UX
- ❖ **Backend & Architecture:** Node.js, Express.js, Next.js API Routes, REST APIs, Microservices Architecture, System Design, Scalable Backend Architecture.
- ❖ **Databases & Caching:** MongoDB, Mongoose, Redis, Database Design, Caching Strategies
- ❖ **3D & Advanced Animations:** Three.js, React Three Fiber (R3F), GSAP (GreenSock Animation Platform), Framer Motion, Smooth Motion Transitions, Interactive 3D Experiences.
- ❖ **AI Integration:** OpenRouter API, Google AI Studio, LLM Integration, AI-Powered Applications, API Integration.
- ❖ **Tools & Platforms:** Git, GitHub, Docker, Postman, VS Code.
- ❖ **Development Concepts:** Clean Architecture, SOLID Principles, Scalable System Design, Microservices, API Architecture, Performance Optimization.

EDUCATION

- ❖ **Higher Secondary School Certificate (F.Sc/Intermediate - 12th Grade)**
- ❖ Govt Higher Secondary School Rajjar 2 | Charsadda, Pakistan Timeline: 2025 - Present
- ❖ **Status:** Currently enrolled in the 12th year (Intermediate/College level).
- ❖ Secondary School Certificate (Matriculation - 10th Grade)
- ❖ Academic Performance: Secured 924 / 1200 Marks in the board examinations.

CERTIFICATIONS & ACHIEVEMENTS

- ❖ **IEEE Web Ascend Certified Full-Stack Developer:** Completed rigorous professional training covering modern web technologies, software engineering standards, and full-stack deployment.
- ❖ **Official Credential Verification:** [Verify Certification Here](#)

- ❖ **Evaluation Honors:** Achieved a top-tier evaluation score of 85/100 for advanced
- ❖ full-stack application development and high-end UI engineering.

EXPERIENCE

- ❖ **Full-Stack & Next.js Developer** | Freelancer / Self-Employed
Remote / International Clients | **2026 – Present**
- ❖ **Full-Stack & Scalable Architecture:** Designed, developed, and deployed scalable end-to-end web applications using Next.js, React.js, Node.js, Express.js, MongoDB, and modern full-stack development practices.
- ❖ **System Design & Backend Architecture:** Designed structured and maintainable backend systems with REST APIs, modular architecture, microservices concepts, database optimization, and scalable application workflows.
- ❖ **Performance & Caching:** Improved application performance and response efficiency through optimized API design, database strategies, caching concepts, and Redis-based data management.
- ❖ **Advanced UI, GSAP & 3D Experiences:** Engineered high-end, interactive user experiences using GSAP, Framer Motion, Three.js, and modern animation techniques, including smooth transitions, timeline animations, and immersive 3D web experiences.
- ❖ **AI Integration & Smart Workflows:** Built AI-powered application features by integrating OpenRouter, Google AI Studio, and LLM APIs for real-time prompt processing, intelligent workflows, and dynamic application functionality.
- ❖ **SaaS & E-Commerce Development:** Developed modern SaaS platforms and feature-rich e-commerce applications with secure authentication, scalable data models, API integrations, and responsive user experiences.
- ❖ **Modern Development Practices:** Applied clean architecture principles, modular development, reusable components, performance optimization, and modern UI/UX standards to build maintainable and production-focused applications.

ACADEMIC PROJECTS

❖ ***Kokhan – Premium Luxury E-Commerce Platform | [Live Demo](#)***

Project Architecture: Developed a high-performance, full-stack e-commerce application using MongoDB, Express.js, React.js, and Node.js.

Advanced UI & Motion: Integrated Framer Motion to create seamless layout animations, fluid page transitions, and interactive user experiences with a premium visual aesthetic.

Core Functionalities: Implemented secure user authentication, product management, structured data models, and a seamless checkout experience.

Performance Recognition: Awarded a top-tier mentor evaluation score of 85/100 for deployment standards and high-end interface design.

❖ ***Lume AI – AI-Driven Website Builder | [Live Demo](#)***

SaaS Innovation: Designed and developed an AI-powered SaaS platform that enables users to generate dynamic and functional websites using natural language prompts.

AI Engine & API Architecture: Integrated OpenRouter and advanced LLM APIs for real-time prompt processing, AI-powered generation workflows, layout generation, and dynamic content generation.

Component Framework: Built modular and responsive user interfaces using Shadcn UI and Tailwind CSS, supported by Node.js and Express.js backend workflows.

❖ ***Luro AI – AI-Powered Content & Productivity Platform | [Live Demo](#)***

AI Content Generation: Developed an AI-powered SaaS platform for generating social media content, marketing copy, captions, and other digital content through intelligent AI workflows.

AI Image Generation: Implemented AI-powered image generation capabilities that enable users to create visual content from text prompts for social media, marketing, and creative purposes.

AI Email Generation: Developed intelligent tools for generating professional, marketing, and personalized email content efficiently.

AI Productivity Tools: Designed multiple AI-powered workflows that centralize content creation, visual generation, writing assistance, and productivity tools within a single platform.

Modern SaaS Development: Built the platform using modern full-stack development practices, reusable components, scalable architecture, responsive UI/UX, and AI API integrations.

POSITION OF RESPONSIBILITY

❖ **Technical Lead & Mentor** | *Peer Development Network & Technical Presentations* | (2026 - Present)

Organized collaborative coding sessions and conducted structured presentations for peers on modern Full-Stack Web Development.

Led project wrap-ups and mapped out comprehensive learning roadmaps focusing on clean architecture, AI API integration, and performance standards.

Provided guidance on high-end UI design systems, teaching effective integration of

tools like Shadcn UI, Framer Motion, and GSAP.

ACHIEVEMENTS / HOBBIES

- **Immersive Gaming:** Passionate about exploring complex narratives and mechanics in open-world action-adventure video games, with a particular interest in the Grand Theft Auto and Assassin's Creed franchises.
- **Deep-Tech Exploration:** Deeply invested in researching cutting-edge AI architectures, advanced prompt engineering, and mastering high-end interactive web motion using GSAP and Three.js.
